## Whole Egg Product

### DON'T FOLLOW THE STANDARD, SET THE STANDARD

For pet foods, egg is the quality standard by which all protein ingredients are measured. Not only that, egg is the single most nutritionally complete whole food item, period.

IsoNova's Ova 46 whole egg product delivers a balanced amino acid profile, energy, vitamins, and minerals to help you formulate better foods and treats. Whether you use egg as a feature ingredient or simply as nutritional assurance, you can't afford not to use Ova 46 in your products.

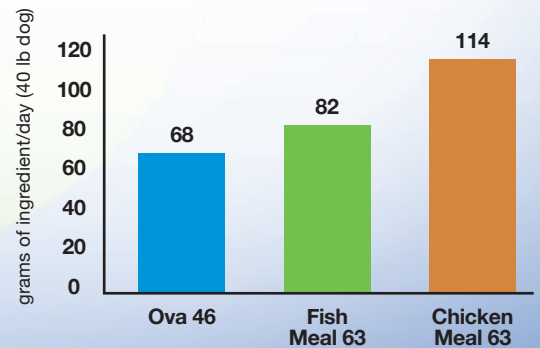

#### Benefits:

- Industry-leading amino acid profile quality
- High protein-to-ash ratio (10:1 or better)
- A natural, label-friendly ingredient
- Shelf-stable
- Nutritionally efficient compared to other protein sources
- Allows for optimal formula flexibility

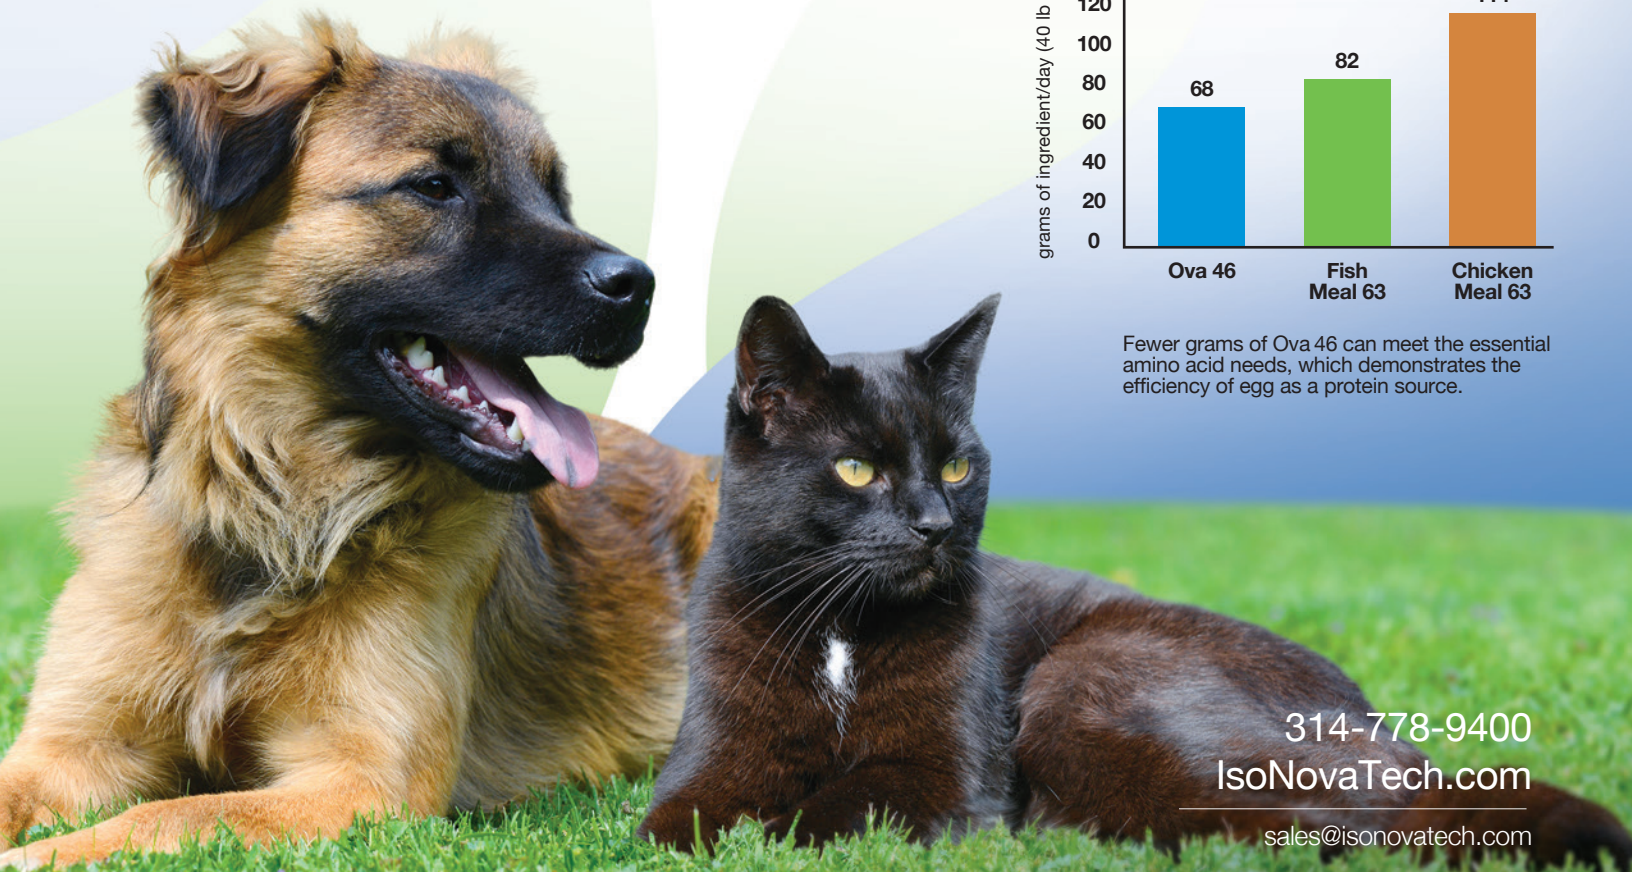

#### Specification:

| PROTEIN               | FAT                   | MOISTURE               | ASH                  |
|-----------------------|-----------------------|------------------------|----------------------|
| <b>46%</b><br>minimum | <b>33%</b><br>minimum | <b>6.5%</b><br>maximum | <b>6%</b><br>maximum |

Ova 46 is most efficient in meeting essential amino acid needs

Fewer grams of Ova 46 can meet the essential amino acid needs, which demonstrates the efficiency of egg as a protein source.
