

OvaBind 80 | by IsoNova

Powerful pet food binding with(out) muscle

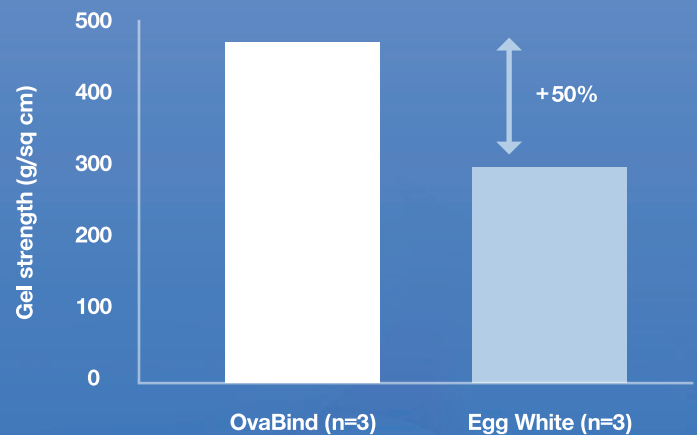

Egg protein has been a binder of choice in cooking and baking for centuries. Modern pet-food processing relies on binding more than ever. OvaBind 80 by IsoNova is the egg-based binder of choice in wet pet foods, treats, and high-meat-inclusion extruded foods. The binding functionality of OvaBind 80 is second to none, and it combines its high functionality with first-class protein nutrition. High-protein, low-ash, incredibly functional – that is OvaBind 80.

OvaBind 80 Benefits:

- Binding functionality for use in
 - Wet foods for cats and dogs
 - Dry foods for cats and dogs
 - Treats
- Raw gel strength exceeds egg whites*
 - Easy to formulate
 - Easy to use
 - Low weep
 - Predictable results
- 80% egg protein minimum
 - Less than 6% ash
 - Very low-fat
- Shelf-stable
- Pasteurized

*Performance will depend on ingredient matrix. Required use rates will vary depending on the formulation, process type, equipment used, and desired performance targets.

Average gel strength of OvaBind 80 compared to commercial egg whites
